### Monthly Fund Performance

September 2018 Edition

### Month gone by – A snapshot

*Global equity markets were mixed in September and developed markets outperformed emerging markets. India was a significant underperformer within the Emerging Markets (EM) pack. Nifty ended the month 6.4% lower, while the mid-cap index was down 12.5%. The INR continued to weaken and was down 2.1% over the month, although measures taken by the government to provide support brought some semblance of stability. Fixed income markets remained under pressure on the back of a weaker INR, tightening liquidity, rising crude oil prices, higher US bond yields and hawkish commentary by US Federal Reserve.*

### Financial sector experienced stress due to liquidity and regulatory issues

Financial sector companies were under significant pressure as one of the large infrastructure companies defaulted on its debt obligations. The company's credit rating was downgraded to D (default) by the rating agencies (ICRA and CARE). There was panic selling in the debt markets, probably led by redemptions. This impacted equity markets as well, leading to a sharp sell-off in financials. Additionally, regulation related concerns in certain companies added to the weak sentiments and led to further selling in the equity market.

### Government stepped in to support INR

Crude oil prices are up by 7% over last one month and 44% over the last one year. Rising crude oil prices adversely impact India's fiscal deficit as well as current account deficit. Higher fuel prices are likely to dampen economic growth through expected higher inflation and possible demand slowdown. The worsening macro-economic scenario has led to a significant depreciation in INR. The government has announced a 'Five point Plan' to support the currency. However, the impact is likely to be marginal.

### Fixed income market performance

**Fixed income market was volatile, yields continue to move up:** 10-year G-sec yields inched up by 7bp during the month, ending the month at 8.02%. Fixed income markets came under pressure and yields touched 8.18% during the month on the back of a weaker INR, tightening liquidity, rising crude oil prices and higher US bond yields. However, yields softened towards the end of the month due to RBI intervention and reduction in the government's borrowing programme for 2HFY19. Foreign institutional investors (FIIs) were net sellers in the debt market (\$7bn YTD).

**Bond yields may stay firm:** The government and RBI have announced several measures to restore liquidity and instil confidence in the market. However, increasing crude oil prices, rising global bond yields, depreciating INR and expected higher inflation are likely to act as dampeners. We expect bond yields to remain firm in the near term.

### Equity market performance

**Equity market correction:** Equity markets witnessed a brutal correction in September 2018, mainly due to stretched valuations, panic in the corporate bond market and its subsequent impact on NBFC space. This coupled with regulatory action in certain banks led to significant profit booking in the financial sector stocks. IT, Pharmaceuticals and Oil and Gas outperformed while Banking & Financials, Automobiles and Capital Goods underperformed. Nifty was down 6.4% whereas BSE Midcap was down 12.5%. FIIs sold over \$1.1bn in equities in September 2018 (\$1.8bn YTD) whereas domestic funds bought equities worth \$1.7bn (\$11.4bn YTD).

**Equity market to consolidate in near-term:** Indian equity market valuation remains slightly above its long term average. Moreover, increasing domestic macro-economic concerns arising from surging crude oil prices and weakening INR are expected to create further pressure on fiscal and current account deficit. This could create headwinds for valuation premium that India enjoys over its regional peers. Investors may choose to remain on sidelines, given political uncertainty ahead of the upcoming state and general elections. These factors, coupled with global geo-political issues such as trade war concerns may lead to equity market consolidating in the near-term.

## Equity Market performance

## The time to consider Critical Illness Insurance is Now

As we celebrate world Cancer day in February, we would like to highlight insurance covers with options for critical illness. The best way to illustrate this is through an ex; Mayank Desai, a marketing executive, was diagnosed with cancer and had a long and painful recovery. While the insurance company took care of the hospital bills, Desai's family had to undergo financial stress to meet household expenses as he stayed home and recuperated.

Desai's case is by no means unique as an increasing number of people are falling prey to critical illness at younger age. At the same time, the cost of health care is rising and crippling Indian households. Keeping this scenario in mind, investing in a comprehensive health insurance plan to safeguard the interest of the family, has become imperative.

One needs to understand the structure and the benefits of different health insurance products before investing. Health insurance plans can be broadly classified in two categories, namely indemnity based and benefits based. Under an indemnity based plan the insured is paid the entire amount that he spends on medical treatment, provided it is equal to or less than the sum assured. Benefits based plans are mainly critical illness plans under which the insured can claim the entire sum assured for the treatment of a critical illness specified in the policy, irrespective of actual costs incurred.

Investing in mediclaim can prove extremely useful in case of minor ailments. However, they become futile in case the insured contracts a critical illness such as cancer which demands much larger expenses over a longer term. A critical illness plan can prove extremely beneficial in this case as the lump sum received by the insured can be used to get the illness treated by best professionals. Also the sum assured, if in excess of the medical treatment, can be used to take care of the household expenses during the time of the illness.

Investors can also go for an endowment based life insurance policy from an insurer with a Critical Illness (CI) rider as it will give them a comprehensive insurance cover. This is to say that the sum assured can be claimed by the insured in case he survives through the term or by his family in case he does not. In addition, with a CI rider to the policy, the medical expenses will also be covered in case a critical illness is contracted during the term, over and above the sum assured.

In addition to providing a cover for medical expenses, health insurance products also attract tax benefits. Investing in comprehensive health insurance therefore will not only provide investor the peace of mind but also the freedom to plan their finances to meet more fundamental financial goals.

## Notes:

1. Morningstar Rating is based on Morningstar Risk-Adjusted Return (MRAR) framework. MRAR is a measure of fund's past performance after adjusting for risk.
2. The above information is as of August 31, 2018 as the performance data for September is yet to be provided by Morningstar.
3. The tables above excludes Multiplier II fund as it is not rated by Morningstar (given its restricted investment universe).

Morningstar rating methodology: Morningstar sets the distribution of funds across the rating levels, assigning three/five star ratings as follows:

1. All funds in the category are sorted by MRAR % Rank for the respective time period in descending order.
2. Starting with the highest MRAR % Rank, those in the top 10% of such funds receive a 5-star rating.
3. The next 22.5% (i.e., ranking below the top 10% and up to the top 32.5%) of funds receive a 4-star rating, and the following 35% (i.e., ranking below the top 32.5% and up to the top 67.5%) of funds receive a 3-star rating.
4. The next 22.5% (i.e., ranking below the top 67.5% and up to the top 90%) of funds receive a 2-star rating.
5. The remaining funds (i.e., the bottom 10% of the category) receive a 1-star rating.

Note: "Others" comprises of combined exposure to securities with less 1% weightage in Portfolio.

### Quantitative Indicators

- **Standard Deviation (SD)** - It shows how much the variation or dispersion of a fund's daily returns has from its average. Lesser SD indicates that the daily returns are moving closer to the average. A higher SD indicates that daily returns are widely spread over a large range of value.
- **Beta** - It indicates how the fund is performing relative to its benchmark. If beta of a fund is higher than its benchmark, which is considered 1, it indicates risk-return trade-off is better and vice-versa.
- **Sharpe Ratio** - It measures the risk-reward ratio as it indicates whether higher returns come with higher or lower risk. Greater the ratio, better is the risk-adjusted performance.
- **Average Maturity** - It is the weighted average period of all the maturities of debt securities in the portfolio.
- **Modified Duration (MD)** - It is the measurable change in the value of a security in response to a change in interest rates.
- **Bond yield** - Bond yield is the amount of return an investor realizes on a bond. Several types of bond yields exist, including nominal yield (interest paid divided by the face value of the bond) and current yield (annual earnings of the bond divided by its current market price). Yield to maturity (YTM), a popular measure where in addition to coupon return it also additionally incorporates price decline/increase to face value of the bond over the maturity period.

### Macroeconomic Indicators

- **Macroeconomics** - Macroeconomics is the branch of economics that studies the behavior and performance of an economy as a whole. It focuses on the aggregate changes in the economy such as unemployment, growth rate, gross domestic product and inflation. Macroeconomics analyzes all aggregate indicators that influence the economy. Government and corporations use macroeconomic models to help in formulating of economic policies and strategies.
- **Gross Domestic Product (GDP)** - GDP is one of the primary indicators used to gauge the health of a country's economy. It represents the total value of all goods and services produced over a specific time period. It can be stated in real terms or nominal terms (which includes inflation).
- **Gross value added (GVA)** - GVA is a productivity metric that measures the contribution to an economy, producer, sector or region. Gross value added provides a value for the amount of goods and services that have been produced, less the cost of all inputs and raw materials that are directly attributable to that production.
- **Index of Industrial Production (IIP)** - The index represents the production growth of various sectors in India. The index focuses on mining, electricity and manufacturing. The ongoing base year for calculation of index is 2004-2005.
- **HSBC Purchasers Managers' Index (PMI)** - Three types of indices - Manufacturing, Services and Composite Index are published on a monthly basis after surveys of private sector companies. An index reading above 50 indicates an overall increase in that variable, while below 50 shows an overall decrease.
- **Inflation** - Inflation measures the change in the prices of a basket of goods and services in a year. From a calculation standpoint, it is the percentage change in the value of the Wholesale Price Index (WPI) / Consumer Price Index (CPI) on a year-on-year basis. It occurs due to an imbalance between demand and supply, changes in production and distribution cost or increase in taxes on products. When economy experiences inflation, i.e. when the price level of goods and services rises, the value of currency reduces.

## Macroeconomic Indicators

- **Nominal interest rate** - Nominal interest rate is the interest rate that does not take inflation impact into account. It is the interest rate that is quoted on bonds and loans.
- **Real interest rate** - Real interest rate adjusts for the inflation and gives the real rate of a bond or a loan.
- **Monetary Policy** - Monetary policy is the macroeconomic policy laid down by the Central bank. It involves management of money supply and interest rates to achieve macroeconomic objectives like inflation, consumption, growth and liquidity. Depending on growth-inflation dynamics, the central bank can either pursue an easy or a tight monetary policy. An expansionary/easy/ accommodative monetary policy involves expansion of money supply, mainly by keeping interest rates low, to boost economic growth. A contractionary/tight monetary policy involves reduction in money supply to control inflation in the economy.
- **Liquidity** - The Central bank of a country has to maintain an appropriate level of liquidity to help meet the credit demand of the country as well as maintain price stability. This is done by way of direct monetary policy tools such as policy rates and cash reserves to be maintained with it by banks. It is also done by indirect means such as Open market Operations (OMO) which involve sale and purchase of Government securities.
- **Fiscal Deficit** - This takes place when India's expenditure rises than its revenue. To fill this gap, the Government raises debt by issuing Government/ sovereign bonds. Fiscal deficit is usually compared with GDP to understand the financial position of the country. Rising fiscal deficit to GDP ratio is not good for the country, which requires immediate attention to cut expenditure and/or increase the source of revenue.
- **Current Account Deficit (CAD)** - Current account deficit is a measurement of a country's trade where the value of imports of goods and services as well as net investment income or transfer from abroad is greater than the value of exports of goods and services for a country. This indicates that the country is a net debtor of foreign currency, which increases the pressure on the country's existing foreign currency reserves. Current account surplus is the opposite of this.
- **Investment** - In private investment, the funds come from a private, for-profit business. A few examples of private investment are a private company's manufacturing plant, a commercial office building, or a shopping mall. In public investment, the money exchanged comes from a governmental entity such as a city, state, country, etc. It would involve roads, airports, dams and other public infrastructure.

## Market Indices

- **Nifty 50 Index** - It is a well diversified 50 stock index accounting for 22 sectors of the economy. It is used for a variety of purposes such as benchmarking fund portfolios, index based derivatives and index funds.
- **CRISIL Composite Bond Fund Index** - It seeks to track the performance of a debt portfolio that includes government securities and AAA/AA rated corporate bonds.

## Fixed Income Indicators

- **Repo Rate** - The rate at which the RBI lends money to commercial banks is called repo rate. It is an instrument of monetary policy. Whenever shortage of funds banks has, they can borrow from the RBI.
- **Cash Reserve Ratio (CRR)** - CRR is the amount of funds which the banks need to keep with the RBI. If the RBI decides to increase the CRR, the available amount with the banks comes down. The RBI uses the CRR to drain out excessive money from the system.

### Fixed Income Indicators

- **Marginal Standing Facility (MSF)** - It is a rate at which the RBI provides overnight lending to commercial banks over and above the repo window (repo rate). The interest rate charged is higher than the repo rate and hence it is used when there is considerable shortfall in liquidity.
- **Statutory Liquidity ratio (SLR)** - In India, commercial banks are required to maintain a certain percentage of their total deposits (net demand and time liabilities) in notified Government securities to ensure safety and liquidity of deposits. This percentage is known as the SLR rate. If the RBI or Central Bank reduces the SLR rate, it means that higher liquidity will be available to banks for their lending activity and vice-versa.

### Others

- **Goods and Services Tax (GST)** - The GST is one of the biggest indirect tax reforms, with an aim to make India one unified common market. It is a single tax on the supply of goods and services, right from the manufacturer to the consumer. Credits of input taxes paid at each stage will be available in the subsequent stage of value addition, which makes GST essentially a tax only on value addition at each stage. The final consumer will thus bear only the GST charged by the last dealer in the supply chain, with set-off benefits at all the previous stages.
- **Foreign institutional investors (FIIs)** - FIIs are those institutional investors who invest in the assets belonging to a different country other than that where these organizations are based. These are the big companies such as investment banks, mutual funds etc, which invest considerable amount of money in Indian equity and fixed income markets, and consequently have a strong bearing on the respective market movement and currency.
- **Domestic institutional investors (DIIs)** - DIIs are those institutional investors who undertake investment in securities and other financial assets of the country they are based in. Institutional investment is defined to be the investment done by institutions or organizations such as banks, insurance companies, and mutual fund houses in the financial or real assets of a country.
- **Emerging market (EM) economy** - An emerging market economy describes a nation's economy that is progressing toward becoming more advanced, usually by means of rapid growth and industrialization. These countries experience an expanding role both in the world economy and on the political frontier.
- **Organization of the Petroleum Exporting Countries (OPEC)** - The OPEC was formed in 1960 to unify and coordinate members' petroleum policies. This was aimed at ensuring the stability of oil markets in order to secure an efficient, economic, and regular supply of petroleum to customers as well as a steady income to producers with a fair return. Members of OPEC include Iran, Iraq, Syria, Kuwait, Saudi Arabia, Bahrain, Qatar, the United Arab Emirates (or UAE), Oman, and Yemen. The OPEC countries produce 40% of the world's crude oil.
- **Federal Open Market Committee (FOMC)** - The FOMC is the monetary policymaking body of the Federal Reserve System. The FOMC is composed of 12 members - seven members of the Board of Governors and five of the 12 Reserve Bank presidents.
- **International Monetary Fund (IMF)** - The IMF, formed in 1945, is an international organization of 189 countries, headquartered in Washington, D.C. The key objectives include fostering global monetary cooperation, securing financial stability, facilitating international trade, promoting high employment and sustainable economic growth, and reducing poverty around the world.

## ULIP

- **PNB MetLife Whole Life Wealth Plan**

UIN: 117L118V01

PNB MetLife Whole Life Wealth Plan is a whole life unit linked plan that provides tailor-made solutions to accumulate wealth along with life protection, including an option where wealth creation doesn't take a back seat even during critical illness.

- **MetLife Smart Platinum**

UIN : 117L066V02

A Unit Linked Whole life plan for your changing life stage needs. Along with 6 Unit Linked Funds & investment strategies like auto rebalancing and Systematic Transfer Option, this plan has free unlimited switches online, which allows you to manage your investments with changing market conditions.

## Traditional Products

- **PNB MetLife Endowment Savings Plan Plus**

UIN : 117N099V01

A plan that helps you accumulate your savings for your financial needs at every stage of life. Additionally, it provides life cover to protect your family along with an option to protect your goals against critical illnesses.

- **PNB MetLife Mera Jeevan Suraksha Plan**

UIN :117N102V01

A comprehensive protection plan with life and terminal illness cover that provides flexible pay out options to protect and fulfil your family's future.

- **PNB MetLife Mera Heart and Cancer Care**

UIN: 117N100V01

A tailor-made health insurance plan that provides you with comprehensive cover against different stages of cancer and heart diseases, without a survival period. It also provides an inbuilt life cover and an option to get your premiums back (net of claims paid) at maturity.

- **PNB MetLife Guaranteed Income Plan**

UIN :117N097V03

An income benefit plan that provides you the customizability of choosing your premium payment term and policy term, while providing guaranteed regular income to cherish little joys in life along with lump sum benefit at maturity to help you turn your big dreams into reality.

- **PNB MetLife Mera Term Plan**

UIN: 117N092V02

A customizable protection plan which gives the option to stay protected till age 99. Four pay out options and coverage for spouse make it a truly flexible offering. Additional protection is also available through riders.

## About Us

PNB MetLife India Insurance Company Limited (PNB MetLife) is one of the fastest growing life insurance companies in the country, having as its shareholders, MetLife International Holdings LLC. (MIHL), Punjab National Bank Limited (PNB), Jammu & Kashmir Bank Limited (JKB), M. Pallonji and Company Private Limited and other private investors, with MIHL and PNB being the majority shareholders.
